簡介

AccessMedicine 是一個創新的線上資源，它為需要快速取得可信賴與最新醫學資訊的醫師、醫學院學生，以及健康醫護專業人士，提供了完整的參考資訊與服務–持續更新。

這個醫學智識庫服務的中心資源，收錄有關內科醫學、心臟病學、遺傳學、藥學、診斷與管理、基礎科學、病患照顧等等，並且在持續增加之中。所有智識庫中的子資料庫，都包含了廣被推崇的優質世界經典醫學書籍之最新版內容。

AccessMedicine 資訊的每日更新，是由 McGraw-Hill 出版商與著名的醫師、學者與科學家所組成的編輯群共同執行。這項每日更新的服務，是為了今日健康醫護專業人士與醫學院學生的需要而訂製的，提供每日即時、可靠的醫學資訊。

而在醫學發展上，專家對新發展的評價是極其重要的。**AccessMedicine** 的專家編輯團隊，一直能與醫學上的新發現、進展與突破，以及科學研究與臨床醫學上的重要議題發展，保持並駕齊驅。

AccessMedicine 的特點如下：

- ☼ 每日更新
- ☼ 提供簡易的檢索方式
- ☼ 提供藥物資料庫
- ☼ 提供每日新聞文章
- ☼ 提供參考性連結至 PubMed 摘要
- ☼ 提供最新實證治療策略
- ☼ 提供病患教育
- ☼ 提供簡明的評
- ☼ 提供醫學界新消息
- ☼ 特別列出更新資訊與新的內容，節省時間
- ☼ 提供數百個相關已分類的網站連結
- ☼ 提供新藥治療法報導
- ☼ 提供最新臨床試驗資料報導
- ☼ 提供自我學習評量測驗工具

AccessMedicine 資料庫主要可分為 **Clinical Library** 與 **LANGE Educational Library** 兩大部分

Clinical Library 收錄有 12 本各醫學領域經典書籍

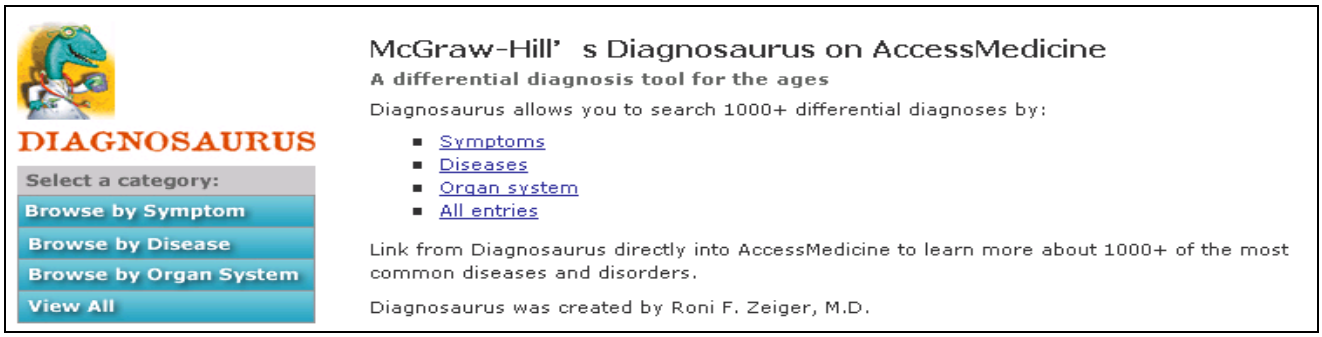
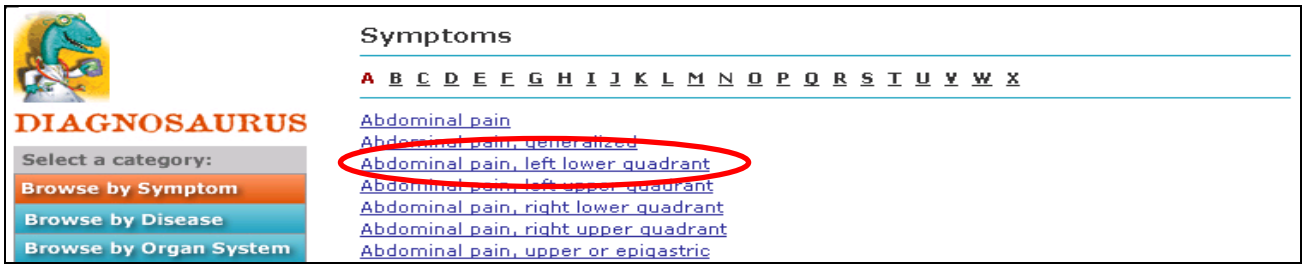
DDx - Diagnosaurus

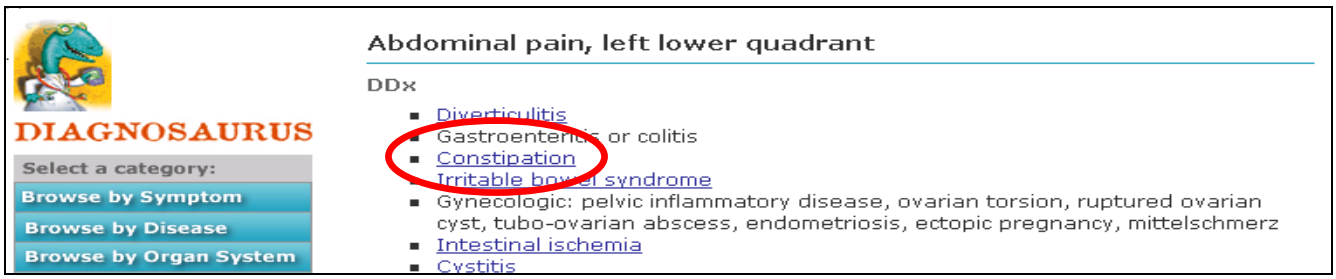
收錄有 1000 種以上的鑑別診斷，使用者可依症狀（Symptoms）、疾病名稱（Disease）、器官系統（Organ system）來進行檢索，進一步診斷出可能罹患的疾病為何。



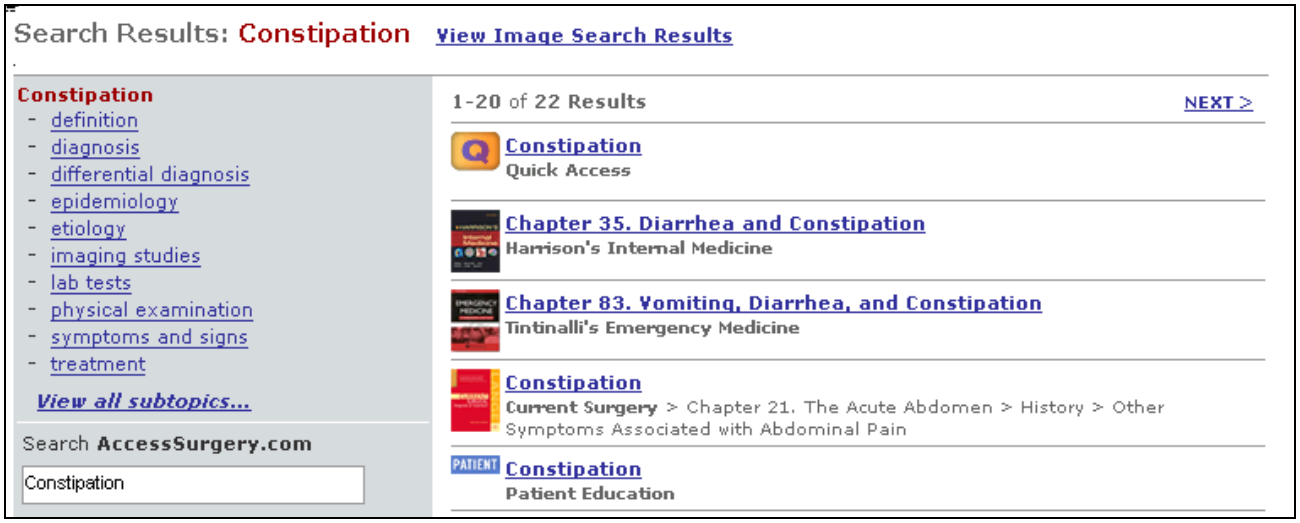
以利用症狀來做診斷依據，首先依症狀來做選擇。



系統會列出所有可能疾病名稱，供使用者做參考。

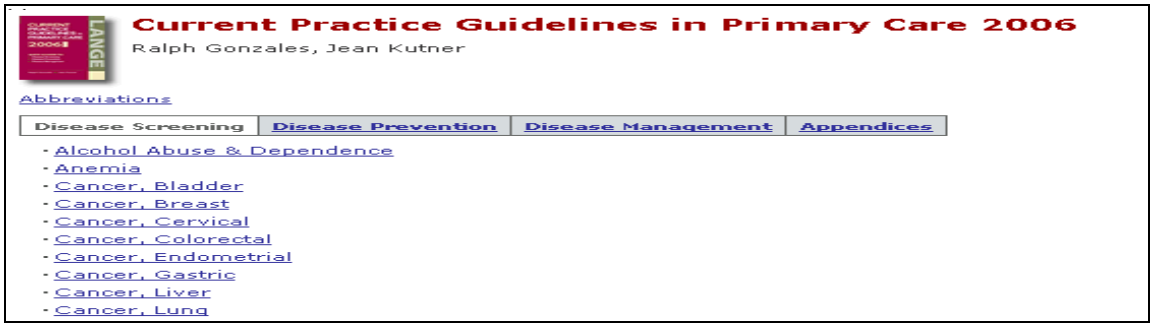


點選單一疾病後，系統會列出此疾病在此資料庫中相關可查詢之資料。



GUIDELINES

根據 Current Practice Guidelines in Primary Care 2006，收錄基層醫療照護相關機構或資料資訊，並將機構分為疾病隔離(Disease Screening)、疾病預防(Disease Prevention)、與疾病管理(Disease Management)三類。



以疾病隔離為例，點選疾病的名稱就可以看到相關機構的資訊，部分提供該機構的連結。

ABORTION
Key Features
Essentials of Diagnosis
• In the United States, 87% of abortions are performed before 11 weeks' gestation and only 1.4% after 20 weeks
• If abortion is chosen, every effort should be made to encourage an early procedure
General Considerations
• The abortion-related maternal mortality rate has fallen markedly since the legalization of abortion in the United States in 1973
• While numerous state laws limiting access to abortion and a federal law banning a rarely-used variation of dilation and evacuation have been enacted, abortion remains legal and available until fetal viability under Roe v. Wade
• The long-term sequelae of repeated induced abortions are uncertain regarding increased rates of fetal loss or premature labor
• Adverse sequelae can be minimized by performing early abortion with minimal cervical dilation or by the use of osmotic dilators to induce gradual cervical dilation

Alkaline Phosphatase

Test/Range/Collection	Physiologic Basis	Interpretation	Comments
Alkaline phosphatase, serum 41 - 133 IU/L [0.7 - 2.2 µkat/L] (method- and age-dependent) Marbled $ Key	Alkaline phosphatases are found in liver, bone, intestine, and placenta.	**Increased in:** Obstructive hepatobiliary disease, bone disease (physiologic bone growth, Paget disease, osteomalacia, osteogenic sarcoma, bone metastases), hyperparathyroidism, rickets, benign familial hyperphosphatasemia, pregnancy (third trimester), GI disease (perforated ulcer or bowel infarct), hepatotoxic drugs. **Decreased in:** Hypophosphatasia.	Alkaline phosphatase performs well in measuring the extent of bone metastases in prostate cancer. Normal in osteoporosis. Alkaline phosphatase isoenzyme separation by electrophoresis or differential heat inactivation is unreliable. Use γ-glutamyl transpeptidase, which increases in hepatobiliary disease but not in bone disease, to infer origin of increased alkaline phosphatase (ie, liver or bone). Asthma

From POSTGRADUATE MEDICINE / VOL 113 / NO 3

You often have trouble breathing, especially when you exercise or vacuum your carpet. But it also happens when you're not exercising. Sometimes you even wake up wheezing during the night. Your doctor tells you that you have asthma, a long-term disease that affects more than 17 million men, women, and children in the United States.

What is asthma?
Asthma is a disease in which a person's airways become inflamed, swollen, and narrowed, making it difficult for air to flow into and out of the lungs. When the airways are swollen, breathlessness and other symptoms of asthma occur.

What are the symptoms of asthma?
People with asthma may have chest tightness, coughing, wheezing, or shortness of breath. Children with asthma may have noisy breathing and may appear very tired after normal play or exercise.

What causes asthma?
No one knows exactly why some people have this condition. What *is* known is that asthma usually flares up in response to "triggers," which can be ordinary things in the environment at home, school, and work. For example, an asthma attack may occur when someone with asthma comes into contact with a pet, cigarette smoke, or pollen. Other common triggers include dust mites, mold and mildew, paint fumes, chalk dust, and cockroach parts and droppings. Symptoms that occur in asthma sometimes happen in people who have a viral or sinus infection or heartburn. These symptoms can also be caused by emotional stress, exercise, breathing cold air, taking certain drugs, or eating some types of food.

Who is most likely to have asthma?
People who have a parent with asthma are 40% more likely to have asthma. African Americans, Mexican Americans, and people who live in poor neighborhoods are at increased risk for asthma. Also, people who have allergic rhinitis, a condition that is commonly called hay fever, are likely to have asthma.

There is no way to predict the course of a person's asthma. Some children with asthma get better when they reach their teens, but others experience worsening symptoms that continue into adulthood. Some people have their first symptoms of asthma in adulthood.

Childhood allergy epidemic on the rise worldwide

Thu Aug 24, 7:05 PM ET
LONDON (Reuters) - Childhood allergies are on the rise around the world, including in many developing countries where asthma, eczema and hay fever are emerging as important public health problems, scientists said on Friday.
Asthma, in particular, is responsible for millions of children missing school, ending up in hospital or even dying.

'Excess' Mortality Higher for Blacks in Urban Versus Rural Areas
By Valerie DeBenedette
Health Behavior News Service
Harlem in New York City and Pitt County, N.C., are both poor parts of the country, but the African-American male population of Pitt County has half the excess mortality rate of Harlem. The difference may be that Harlem residents have less access to good health care and less social support than do the rural inhabitants of Pitt County, a new study suggests.
"I did not expect these results. If you told me earlier that rural people would have had better health care, I would not have believed it," said lead study author Dr. Arline Geronimus.
"Excess mortality" is the number of deaths per 100,000 African-Americans over and above the death rate for whites nationwide.
The study, published in the August issue of the Journal of Health Care for the Poor and Underserved, evaluated data from separate surveys on risk factors associated with excess mortality. Responses came from 963 African-American adults in Harlem and 1,773 of their Pitt County peers.

A 36-year-old male with sudden onset of painful crusted erosions on the eyelids
Pink papules appeared suddenly on the eyelids; lesions quickly became crusted and sensitive. He had prior history of atopic dermatitis, which he treated intermittently with 2.5% hydrocortisone cream. On examination, multiple crusted erosions are present on the eyelids with a few satellite lesions. There is no erythema of the eyes.
